

Create lightning

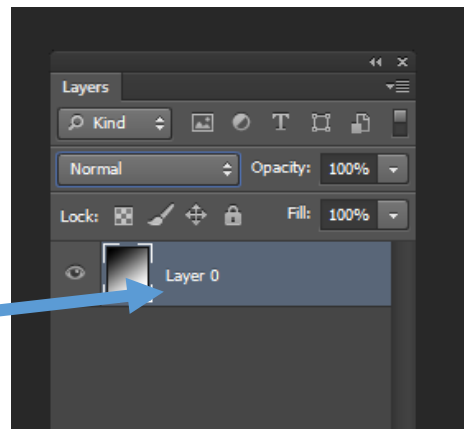

Follow the directions on this website:

<http://www.photoshopcafe.com/tutorials/lightning/lightning.htm>

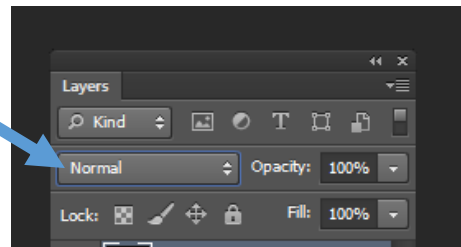

1. create a gradient by clicking on gradient tool.
2. Click on the top bar that arrow is pointing at.
3. Change it to black and white
4. Use the pointer to draw a diagonal line on your artboard.

Before you do step 6 you must double click on the layer named "background" and click okay. This will change the background to a layer as you see

Step 6 – click on normal and change to screen. This makes the lightning show up over the background you will move onto your lightning. The background --- is any image you want---

Examples:
